

**BASEL 3**  
**Regulatory Liquidity Disclosures**

For the three Months ended 30<sup>th</sup> June 2023

## **Liquidity Coverage Ratio (LCR) for the quarter ended 30<sup>th</sup> June 2023**

### **Introduction**

In August 2018, the Central Bank of Bahrain (CBB) issued its regulations on Liquidity Risk Management (LM). The regulations require Bahraini bank licensees to meet a minimum Liquidity Coverage Ratio (LCR) of 100% on a daily basis. The objective of the LCR is to improve resilience of banks' short-term liquidity risk profile by ensuring that they have sufficient level of high-quality liquid assets (HQLAs) to honor net cash outflows and survive a significant stress scenario lasting for a period of up to 30 days.

### **GFH Financial Group Liquidity Coverage Ratio**

The group has reported an average LCR for the period of 237% for Q2 2023.

### **High Quality Liquid Assets (HQLA) Portfolio**

Assets qualify as HQLA if they can be easily and immediately converted into cash at little or no loss of value under stress circumstances. HQLA comprises of Level 1, Level 2A, and Level 2B liquid assets. Level 1 assets comprise of an unlimited share of the total pool and are not subject to haircuts. A 15 % haircut is applied to the current market value of each level 2A asset held in the stock of HQLA. Level 2B liquid assets, are considered less liquid and more volatile than Level 2A liquid assets.

GFH has constantly maintained a robust portfolio of High Quality Liquid Assets (HQLA) to support its liquidity position. The Group's total adjusted weighted HQLA for the reporting period has increased by 33% for Q2 2023 compared to Q1 2023.

### **Net Cash out Flow**

The term total net cash outflows is defined as the total expected cash outflows minus total expected cash inflows in the specified stress scenario for the subsequent 30 calendar days. GFH calculates its outflows on the basis of total expected cash outflows of various categories or types of liabilities and off-balance sheet commitments such as Deposits repayments and Term debts by the rates at which they are expected to run off or be drawn down.

Total expected cash inflows are calculated by multiplying the outstanding balances of various categories of contractual receivables such as money market placements and other non-HQLA securities funded by the Group; by the rates at which they are expected to flow out under the scenario up to an aggregate cap of 75% on total expected inflows as % of total expected cash outflows.

## **Net Stable Fund Ratio (NSFR) for the quarter ended 30<sup>th</sup> June 2023**

### **Introduction**

Net Stable Funding Ratio (NSFR) is defined as the amount of available stable funding (ASF) relative to the amount of Required stable funding (RSF) This ratio should be equal to at least 100% on an ongoing basis. In August 2018, the Central Bank of Bahrain (CBB) issued the regulations to banks operating in Bahrain on the reporting of the Net Stable Funding Ratio effective 31 March 2019.

### **Net Stable Fund Ratio (NSFR)**

The Group's NSFR stood at 105% as at 30<sup>th</sup> June 2023.

### **Available Stable Funding (ASF)**

ASF is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to 1 year. The Group reported Total weighted ASF value was USD 6,234 mn.

### **Required Stable Funding (RSF)**

RSF is defined as the portion of assets and OBS exposures expected to be funded on an ongoing basis over a 1-year horizon. The total weighted RSF stood at USD 5,935 mn.
